

EQUIPMENT & SERVICES

Desuperheater Nozzle Inspection, Testing & Replacement Services

Improve Plant Performance. Protect Vital Equipment.

Improper Spray Water Nozzle Maintenance Can Lead to:

- ❖ Poor quality steam
- ❖ Erosion and wear on piping
- ❖ Damage to downstream equipment
- ❖ Decreased capacity leading to underspray
- ❖ Lost production efficiency and revenue
- ❖ Inadequate temperature control

Our Spray Nozzle Maintenance Program Includes:

- ❖ Time-based inspection & replacement with rotating spares
- ❖ Onsite testing using our nozzle testing rig
- ❖ In-depth repair report including pictures, videos, & future recommendations
- ❖ Replacement parts stocked at our warehouse
- ❖ Materials review & upgrade
- ❖ Additional diagnostics & repair of control valves

Proconex can help you provide high quality steam to your most critical processes by properly maintaining your desuperheating or attemperating equipment.

Never Underestimate the Impact of Preventative Maintenance.
